

ROUNDSTONE SOLUTIONS RECOGNIZED IN CRN NEXT-GEN 250 LIST
*Annual List Features Trailblazing Solution Providers Transforming Business with
Emerging Technologies*

San Francisco, CA, August 10, 2015 – Roundstone Solutions, Northern CA’s premier IT infrastructure integrator, announced today it has been recognized in [The Channel Company’s](#) exclusive [2015 CRN® Next-Gen 250 list](#). The annual list honors forward-thinking technology solution providers who have transformed their business by breaking into emerging technologies such as cloud computing, unified communications, virtualization, mobility, business analytics and business intelligence. These solution providers, each in business for less than 20 years, have adapted to an evolving marketplace with precision, clearly identifying themselves as the leaders of the future.

Roundstone Solutions focuses its business on helping end-user customers make the transition from older, traditional IT infrastructures to more modern, higher performing and less costly architectures. Based in San Francisco, Roundstone partners with industry leaders like Nutanix, NexGen, Brocade, and others to deliver next generation IT infrastructures.

“We’re very pleased that CRN has recognized Roundstone Solutions, based on the good work we are doing with our customers. Of course, we’re even more pleased by the results that our customers are getting from the newer architectures we have helped them create”, said Tim Joyce, President and CEO of Roundstone Solutions. “We’re all about helping companies create a “Cloud” datacenter that they control, with innovation, performance, agility, and savings as the four (4) main design points”, Joyce continued.

“As emerging technologies come to market, so do the new delivery models needed to support them. Agile integrators are in demand now more than ever to architect new technology solutions to meet customer needs,” said Robert Faletra, CEO of The Channel Company. “The trailblazing solution providers honored in this year’s CRN Next-Gen 250 list continue to innovate and evolve to meet market demands and have clearly established themselves as the next generation of leadership in the IT channel. We congratulate the honorees named to this exclusive list for their achievements and look forward to following them in the future to see what they have in store.”

A sampling of the Next-Gen 250 list will be featured in the August issue of CRN and online at both www.crn.com and through the CRN Tech News App for [iPad](#) and [Windows 8](#).
